- > Your peace of mind is our priority
- > We provide beds, bunks, metal folding beds, pillows and accessories

About Sleep Safe Bunks and Metal Beds

Sleepmaker were the sole provider of Bunk Beds to the Sydney 2000 Olympics and the 2006 Melbourne Commonwealth Games and demonstrated the ability to provide product to exacting specification for these two prestigious sporting events in Australia.

With seven manufacturing plants throughout Australia and New Zealand, and 76 years in the bedding business Sleepmaker has become synonymous for its unique continuous coil technology providing comfort and support in every bed.

The Sleepmaker focus is on providing comfortable quality accommodation at competitive pricing with innovative product design.

Sleepmaker and Tontine are divisions of the Pacific Brands Commercial Group, manufacturing recognised brand names of Simmons, Serta, Dunlopillo and Doona under the group umbrella.

Tontine is the largest Australian manufacturer of Pillows, Mattress Protectors and Doonas and is a recognised supplier to the Accommodation Industry.

Sleepmaker has a well-regarded reputation as a first-class supplier of quality beds to the accommodation industry from backpackers to 5 Star Hotels.

Sleep Safe Bunks have been a long-standing supplier to major national accommodation facilities in Australia.

Hospitality, Government Departments, Sport and Recreation, State Universities, Australian Department of Defence, Australian Immigration Dept and many other major facilities.

Sleep Safe Bunks, represent the only branded range of bunks in the Australian/New Zealand markets, designed specifically for the accommodation market with heavy-duty steel components, and unique design features. All bunks are tested to the Australian Bunk Bed standards as follows:

A - AS / NZS 4220:2003 Bunk Beds

B - 2003- Consumer Product Safety Standard - Bunk Beds Standard A is the most stringent of the two testing methods, which primarily tests various components of the Bunk verifying overall strength and durability.

Backpacker Multi Side Ladder: This is the No. 1 selling commercial model featuring slightly wider bunks for easier bed making; expanded gap between the top and bottom bunks, and is for adult use. It comes with a multi-positional side ladder.

Each bunk features all-steel construction, an essential requirement for safety and protection against the 'bed bug' sweeping our northern States.

Mattress, waterproof health care cover and bed bug repellent fabrics are additional product options

Balmoral Single & King Single Bed: Designed specifically for student accommodation and features a 173 kilo weight load ratio to the base system. There are no bolts or nuts required as the slot-in bracket allows for rapid assembly and disassembly.

Folding Bed: Full single bed size steel frame folding bed design includes 95mm of deep foam mattresses.

Trundle: The roll out and lift-up designs are low profile, for use under beds and bunks.

Under bed storage: A new release - Storage Locker that goes under the Sleep Safe Bunks and beds for Student, Backpacker and Hostel use. It has an all-steel frame with two independent lockable compartments.

The advantage when dealing with Sleepmaker in each State is that the one contact can help you with all your needs - each is very much your one-stop shop.
